SUMMARY

Experienced Senior Web Developer with 5+ years of building fast, reliable, and user-friendly web applications. I specialize in both front-end and back-end development, working with modern frameworks like React and Node.js, and I enjoy turning complex problems into clean, efficient code. I've led development teams, collaborated closely with designers and stakeholders, and helped launch products that are scalable and easy to maintain. I'm comfortable working in Agile environments, familiar with cloud platforms like AWS, and always looking for better ways to build and deliver software. At the core, I care about writing code that lasts, creating intuitive user experiences, and staying sharp in a fast-moving tech world.

SKILLS

HTML + CSS	Angular	AWS
React	Node JS	CICD
Javascript	Python	

PROFESSIONAL EXPERIENCE

HERE Technologies

Feb 2022 - Present
